# MATERIAL INPUT OVERVIEW

## OUR OBJECTIVE

We help direct businesses towards companies that are dedicated to delivering clean, quality products every time.

From the farm to the shelf we verify **Best Management Practices**, the production of **Clean & Compliant** crops, **Environmental Stewardship**, and a commitment to **Social Justice**.

Envirocann Certification aims to connect conscious brands and consumers...the ones **dedicated** to the **community** and to the **integrity** and **health** of the plant.

## Envirocann Approval

We offer input manufacturers a product approval service that verifies local, state and environmental compliance along with a heavy metals test, and/or a pesticide residue test.

Approved Input Material certification requires complete ingredient disclosure for compliance review. Onsite inspections of manufacturing facilities may be required. The **Envirocann** logo is used to distinguish **Clean, Compliant**, and **Sustainably** manufactured products.

## Envirocann Approval

**Envirocann** product approval reflects that all state and local compliance standards are met along with the use and disclosure of only approved Organic inputs. This level of certification allows manufacturers to display the **Envirocann** logo on their products. The **Envirocann** logo represents products manufactured using exemplary practices, organic inputs, and in a manner exceeding current National Organic Standards.
